Bachelor of Applied Science

Student Learning Outcomes
Graduates of the BAS degree program will have the knowledge and skills to:

- Understand the social responsibilities of being a member of a professional community and the ethical values which are integral to personal and professional success.
- Identify and access information and be able to interpret, summarize, synthesize and convey this information to others using a variety of technology platforms.
- Understand the key concepts and be able to demonstrate the ability to apply the latest knowledge, techniques, concepts and tools of a profession to solve problems and address the needs of society, organizations and individual clients.
- Demonstrate knowledge of the relationship of professionals to society at large, the role of the professional as part of that society and the ability to analyze how changes in technology will impact the future of their profession and its relationship with society.
- Demonstrate skills and abilities in critical thinking, creativity, communication and analysis to facilitate career progression in their profession.

Accreditation
The program has been approved by the Northwest Commission on Colleges and Universities.

Mission Statement
The mission of the Bachelor of Applied Science is to fulfill and to extend the mission and philosophy of Great Basin College by providing a distinctive baccalaureate degree that builds upon the technical skills and knowledge acquired in attaining an Associate of Applied Science and, in particular cases, an Associate of Science or Associate of Arts degree. In this endeavor, the program is designed to instill abilities and qualities of competence, personal communication, management, and decision making within a broader context than a single vocation. The program will build on the individual’s current vocational abilities and provide additional managerial skills within a specific field of emphasis. Those completing the program should then be prepared to competently and efficiently engage their chosen vocational field as either highly trained technicians or effective managers.

Purpose Statement
The purpose of the Bachelor of Applied Science (BAS) Program is to provide a quality and affordable four-year degree to residents of rural Nevada. This degree is particularly suited to accommodate working adults whose schedules may be limited due to work and time constraints.

Contact Information
Bachelor of Applied Science degree program, 775.753.2363 or 775.753.2217.

About the Program
Greater Accessibility
The program is designed for students who have previously completed an associate’s degree at an accredited college or university. There are currently six emphases: Digital Information Technology Emphasis, Human Services Emphasis, Instrumentation, Land Surveying/Geomatics, Management and Supervision Emphasis, and Graphic Communications. These are particularly attractive to employers of the school’s service area and provide an avenue of continuing education for all persons with work experience to complete a baccalaureate degree at Great Basin College.

Meets Employer Demand
The program is intended to build on the student’s associate degree curricula, work experience, and maturity. It will provide the student with communication and problem solving skills, management and organizational theories and practice, and a broad liberal arts view of the world and workplace. This training is designed to prepare students for employment in demanding management positions, depending on the emphasis a student selects. The focus in the curriculum on the values of lifelong learning and positive human relation skills will be especially beneficial to graduates of this program.

Program Strengths
This degree program addresses many of the widely acknowledged deficiencies of the traditional bachelor’s education. It represents a shift away from a narrow-focused, speciality program to a broader approach with courses taught by colleagues from across all disciplines at the College. This strategic adjustment allows our students to experience a broader array of values and attitudes about their field of study and to enlist the alliance of employers within our service area as educational partners and stakeholders in the success of this degree program. We believe these learning partnerships allow Great Basin College to deliver an innovative training program whose graduates are sought out because:

1. GBC’s program is more reflective of the ideal bachelor’s educational philosophy: a broad liberal arts exposure.
2. The program instills in its graduates professional ethics and leadership skills needed to make critical decisions.
3. The program supplies students with a unifying operational and practical framework for problem
solving; thus, stakeholder value is enhanced and a position of distinctiveness in bachelor’s level education in this region is achieved.

GBC’s academic approach to the delivery of education will help students become innovative leaders and practitioners in organizations that value continuous renewal of their culture and management approach. This gives our graduates a significant, distinct, comparative advantage in their chosen career fields.

Admission to the Program
Students will be admitted to the program in a Full Admission status when all admission requirements have been completed and accepted by the Program Supervisor and/or Emphasis Advisors. Students who do not maintain good standing, as defined, will be placed on Probationary Status. Students on probationary status are not allowed to continue toward completion of the program until they have removed all restrictions. The manner for reinstatement to good standing will be determined by the Committee on a case-by-case basis.

To be officially admitted to the Bachelor of Applied Science Program, students should do the following.

STEP 1: Inquiries
As soon as practical, applicants should meet with a faculty program advisor to outline a proposed course of study.

STEP 2: Application Process
Students must present evidence of completion of an associate’s degree from a regionally accredited college.

Students should submit transcripts indicating an overall grade-point average (GPA) equal to or greater than 2.0, as calculated by Great Basin College formulas. Students should submit a program application to the Admissions and Records Office before completion of 30 credits in the program.

STEP 3: Follow Up
Students have the responsibility to ensure that official transcripts and any other requirements are actually received by the Director of Admissions and Registrar of Great Basin College.

NOTE: Evaluation of the entrance criteria will be made by the Program Supervisor and/or Emphasis Advisors. This processing takes approximately five to six weeks. Students will be notified by a letter from the Program Supervisor upon acceptance/denial.

Pre-admission Information
Some emphases of the program may have their own special admission requirements.

- Completion of an approved electrical program is required before official admission to the Instrumentation program.
- The Graphic Communications emphasis requires an AAS in Computer Technology with a Graphic Communications emphasis for admission, or advisor permission.
- See the Land Surveying/Geomatics emphasis for a list of prerequisites.
- The Digital Information Technology Emphasis requires an associate’s degree, and a strong background in computer technology with an emphasis in one of the many computer technology fields, such as networking, information technology, computer office technology, computer programming, GIS, or some other computing field.
- See the Human Services Emphasis for a list of prerequisites.
- Students with a bachelor’s degree from a regionally accredited college or university will not be required to take general education courses unless they are listed under the Emphasis Requirements or are needed as prerequisites for more advanced requirements.

Maintaining Good Standing
Students who have been admitted to the Bachelor of Applied Science Program will maintain their status as students in good standing, and be allowed to graduate, if they meet the following requirements:

- Maintain an overall 2.0 cumulative GPA in all GBC courses.
- Maintain a cumulative GPA of 2.0 in all upper-division courses applied to the degree. This includes courses taken at GBC and those transferred from other institutions.
- Refer to specific BAS program emphasis for any variation of requirements.

Total Minimum Credits for BAS ........................................120
Total Minimum Upper-Division Credits .........................42
Land Surveying/Geomatics

Bachelor of Applied Science — Land Surveying/Geomatics Emphasis

Student Learning Outcomes

Graduates with a BAS with an emphasis in Land Surveying/Geomatics will be able to:

- Proficiently apply sound measurement methods, mathematics, science, and surveying tools to collect, analyze, and edit spatial information in professional applications.
- Develop a sound background in the humanities, social sciences, and the arts, to function in multicultural and diverse environments.
- Provide fundamentals in business management to enable graduates to understand business environments and decision-making processes.
- Convey spatial information in graphical, textual, and verbal forms as an individual or as a collaborating member of a professional team.
- Prepare to take and pass the Fundamentals of Land Surveying examination developed by the National Council of Examiners for Engineering and Surveying (NCEES).
- Satisfy the educational requirements for licensure required by NRS.625.270 as a professional Land Surveyor in Nevada and recognize the benefit of life-long learning by participating in continuing education as students or as instructors.

See page 90 for important additional information about the Bachelor of Applied Science Program.

Entrance to the Land Surveying/Geomatics Emphasis requires an earned associate's degree and the completion of a college-level trigonometry course.

Prerequisite Requirements

The following courses or transfer equivalents are prerequisites for completion of the upper-division emphasis requirements:

- CADD 121 CAD for Land Surveyors
- GIS 109 Introduction to Geographic Information Systems
- MATH 181 Calculus I
- PHYS 151 General Physics I or
- PHYS 180 Physics for Scientists and Engineers I
- STAT 152 Introduction to Statistics
- SUR 280 Fundamentals of Geomatics I
- SUR 281 Fundamentals of Geomatics II
- SUR 290 Introduction to Urban Development

General Education Requirements

- COM 101 Oral Communication, or
- THTR 102 Introduction to Stage Voice, or
- THTR 221 Oral Interpretation .........................3
- PHIL 311 Professional Ethics (formerly ECON 311) ....3
- ENG 333 Professional Communications ..................3
- INT 339 Integrative Humanities Seminar, or
- INT 349 Integrative Social Science Seminar ..........3
- INT 359 Integrative Mathematics Seminar ..............3

Total Credits ..................................................15

Applied Science Core Requirements

- FIN 310 Applied Accounting and Finance ............3
- MGT 310 Foundations of Management Theory and Practice ......................3
- MGT 323 Organizational Behavior and Interpersonal Behavior, or
- MGT 367 Human Resource Management .................3
- INT 369 Integrative Science Seminar, or
- PHYS 152 General Physics II or
- PHYS 181 Physics for Scientists and Engineers II ....4
  (PHYS required for Land Surveying/Geomatics Degree)

Total Credits ..................................................13

Program Emphasis Requirements

- CADD 421 Advanced CAD for Land Surveyors .......3
- MATH 182 Calculus II .............................................4
- SUR 255 Introduction to Mine Surveying and
- SUR 456 Advanced Mine Surveying, or
- SUR 450 Construction Surveying ...................... 3-4
- SUR 320 GIS for Surveyors .................................3
- SUR 330 Introduction to Least Squares
  Adjustment ..................................................3
- SUR 340 Photogrammetry and Remote Sensing .......3
- SUR 360 Public Land Survey System .................3
- SUR 365 Legal Descriptions ...............................3
- SUR 440 Geodetic and GPS Surveying ...............3
- SUR 460 Advanced Boundary Analysis .................3
- SUR 495 Land Surveying/Geomatics Capstone .......3

Total Credits ..................................................34-35

Total Credits for Sections Above ..................... 62-63

Note: All students graduating from Nevada institutions of higher education must satisfy the U.S. and Nevada Constitutions requirement. Contact your academic advisor for details.
